

With telemedicine being new to our practice and to our patients, we want to walk you through the simple and easy steps of a telemedicine appointment. Please read this document and then scroll to the bottom to find photos to further assist you.

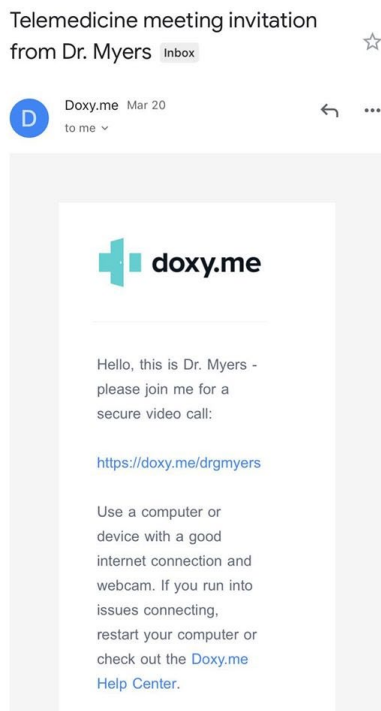

First, if you haven't already, you will call and request to change your in office appointment to telemedicine. You will be able to keep your current date and time.

Next, you will receive an e-mail or text message from Doxy.me titled "Telemedicine Meeting Invitation from Dr. _____" around your scheduled appointment time. You may access this e-mail/text via a laptop, desktop or your smart phone. You will click on the link in the e-mail and be directed to a web browser. You will be asked to "check in" by entering your name. Once you enable the camera and microphone, you will be sent to the "waiting room" where the provider will start your call/appointment shortly thereafter.

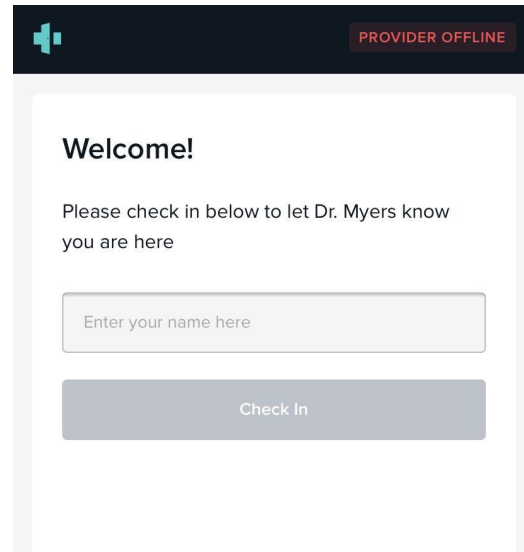

It truly is a simple and easy process that allows you to be seen, all while in the safety and comfort of your own home!

Please let us know if you have any questions! At times like these when our community's safety is paramount, we are grateful that telemedicine exists and we are able to offer it to you!

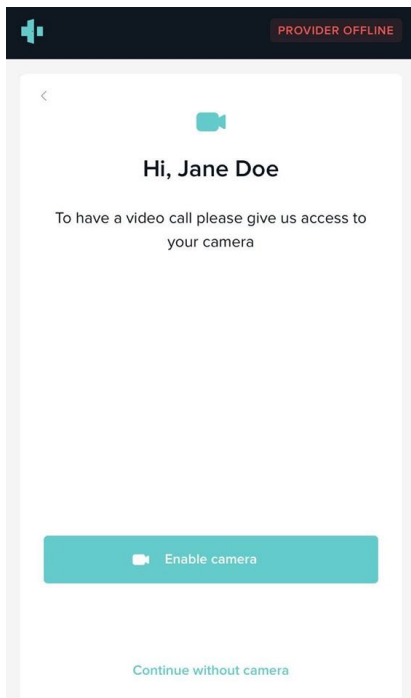

STEP 1: e-mail from your provider

STEP 2: open web browser & “check in”

STEP 3: enable camera & microphone

STEP 4: wait for your Dr. to begin the call
